# NON SPARKING TOOLS

Non Sparking tools are made up of Non-ferrous materials and hence reduce the risk of the spark being created while the tool is in use. Non-sparking tools protect against both fire and explosion in the dynamic environment that may contain flammable solvents/liquids, flammable vapours, flammable dusts or residues. When working in the confined spaces and areas where flammable gases or dust are present using a Non-Sparking tool is the best course of action.

## INSULATED NON SPARKING INJECTION MOULDED INSULATION

Injection Moulding is better for engineered parts that have significant loads and require tight tolerances.

1000V

Manufactured according to IEC 60900 Standard

## DIPPED INSULATION

Dip Moulding is better if physical requirements aren't demanding and close tolerances aren't required.

## STAINLESS STEEL TOOLS

Austenitic Stainless Steel is the largest family of Stainless Steels. The best known grade of Austenitic Stainless Steel in Type 304, for its austenitic micro structure exclusivity by Nickel & Chromium alloying. It is less electrically & thermally conductive than Carbon Steel & is essentially Non Magnetic. It has Higher Corrosion resistance than regular steel.
